NexaWorks

A plan you can hold us to

Response to RFP-2026-017: Cloud Procurement & Supplier Management Platform for Meridian Manufacturing Ltd. FICTIONAL document for training use.

1. Executive Summary and Understanding of the Requirement

NexaWorks proposes a balanced, low-risk programme for Meridian Manufacturing: a proven platform, a detailed delivery plan and a support model designed around plant operations.

Our solution is a cloud platform with modular sourcing, supplier management and contract components that Meridian can switch on in stages.

2. Proposed Solution and Approach

Architecture. Modular cloud application with a documented REST API, hosted in two regions with daily backups and a recovery time objective of 4 hours.

Integrations. Standard connectors for SAP and Oracle ERP, SSO via SAML 2.0, and a data-migration toolkit. Interfaces are documented in the design phase.

3. Timeline, Team and Milestones

The programme runs 6 months in five phases with a dedicated team of 9: programme manager, business analyst, three engineers, two testers, a trainer and a support lead. Weekly steering reports and a shared risk register are included. Each phase has entry and exit criteria and a named Meridian approver.

Risk plan. Top five risks are tracked with owners and mitigations: data-quality in the supplier master, ERP interface delays, user adoption, plant availability for testing, and scope change. Contingency of two weeks is built into the schedule.

Milestone	Week	Deliverable
Mobilisation	2	Project charter, RACI, risk register
Design sign-off	6	Process and interface design
Build complete	14	Configured platform, migrated test data
User acceptance	20	UAT signed off by Meridian
Go-live	24	Phased rollout, hypercare for 6 weeks

4. Price and Assumptions

Item	Cost (USD)
Licence, years 1-3	165,000
Implementation services	110,000
Integration and migration	45,000
Training and hypercare	20,000
Total (3 years)	340,000

Assumptions: Fixed price. Includes up to 3 ERP interfaces and 250 users in year 1. Additional users are USD 220 per user per year. Travel is billed at cost.

5. Security, Compliance and Risk Controls

NexaWorks is ISO 27001 certified. SOC 2 Type II is in progress, with the audit window closing in Q1. Data is encrypted at rest and in transit, access is role-based with MFA, and audit logs are retained for 3 years. GDPR data processing terms are provided.

6. Support Model, Experience and References

24x7 support with a 1-hour response for severity 1 incidents is included in the licence. Meridian receives a named customer success manager, quarterly service reviews and a monthly release calendar.

NexaWorks has 7 years in business and 14 comparable projects. Two references are listed: a European auto-parts group and a regional food manufacturer.
